Summary:

A detail-oriented Data Analyst who loves working with data, uncovering insights, and enabling better product and business decisions.

Technical Skills :

- SQL, Microsoft Excel, Google Sheets
- Python, BI Tools: Tableau, Power BI
- Data Analysis & Visualization
- Problem Solving & Insight Generation

Projects:

Project 1: Microsoft Sales and Forecasting Dashboard

- Built an interactive Power BI dashboard analyzing 10k+ sales records, automating 12 key KPIs(YOY Growth, Profit Margin, Forecasting), reducing manual reporting time by 60%.
- Improved sales forecasting accuracy by 22% using time series modeling & DAX calculations.

Project 2: Customer Churn Analysis(Python)

- Analyzed 7,043 customers using python to identify churn patterns; engineered 18 predictive features improving churn model accuracy to 86%.
- Identified top churn drivers(contract type, tenure) enabling potential 10-15% retention improvement.

Project 3: HR Attrition Dashboard

- Built a Power BI HR Analytics dashboard visualizing 1,470 employee records; automated attrition analysis, reducing HR reporting time by 45%.
- Discovered 3 major attrition risk factors(low tenure, low salary, low mismatch), supporting data-driven workforce decisions.

Project 4: Retail Superstore Sales Dashboard

- Created a sales dashboard analyzing 9,994 orders across regions/categories; identified 6% loss margin in Furniture segment using DAX-driven KPIs.
- Improved demand forecasting by 18% through seasonal trend analysis.

Education:

Poornima College Of Engineering, Jaipur | Bachelor's degree in Computer Science & Engineering | September 2024 to July 2028
